Approved Use

INGREZZA® (valbenazine) capsules is a prescription medicine used to treat adults with movements in the face, tongue, or other body parts that cannot be controlled (tardive dyskinesia).

It is not known if INGREZZA is safe and effective in children.

IMPORTANT SAFETY INFORMATION

Do not take INGREZZA if you:

- are allergic to valbenazine, or any of the ingredients in INGREZZA.

Before taking INGREZZA, tell your healthcare provider about all of your medical conditions including if you: have liver or heart problems, are pregnant or plan to become pregnant, or are breastfeeding or plan to breastfeed.

Tell your healthcare provider about all the medicines you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements.

Please see additional Important Safety Information on page 8 and accompanying INGREZZA Patient Information.
What is INGREZZA?

INGREZZA is the only once-daily treatment for tardive dyskinesia (TD).

INGREZZA® (valbenazine) capsules is used to treat adults with TD movements in the face, tongue, and other body parts. It is not known if INGREZZA is safe and effective in children.

Some mental health medicines (antipsychotics) can cause abnormal dopamine signaling in the brain, which can lead to uncontrollable body movements from TD that are unlikely to improve without treatment.

INGREZZA is thought to reduce extra dopamine signaling while working directly in the region of the brain that causes the uncontrollable movements of TD. How INGREZZA works to treat TD is not fully understood.

- Dopamine is a chemical in the brain that helps control movement
- TD may be caused by too much dopamine signaling in the brain
- INGREZZA is believed to reduce extra dopamine signaling

Important Safety Information (cont.)

INGREZZA may cause serious side effects, including:

- Sleepiness (somnolence). Do not drive, operate heavy machinery, or do other dangerous activities until you know how INGREZZA affects you.

- Heart rhythm problems (QT prolongation). INGREZZA may cause a heart problem known as QT prolongation.

  Symptoms of QT prolongation may include:
  - fast, slow, or irregular heartbeat
  - dizziness or fainting

  Tell your healthcare provider right away if you have a change in your heartbeat (a fast or irregular heartbeat), or if you faint.

- Abnormal movements (Parkinson-like). Symptoms include: shaking, body stiffness, trouble moving or walking, or keeping your balance.

Please see additional Important Safety Information on page 8 and accompanying INGREZZA Patient Information.
Simple dosing with INGREZZA

One capsule, once a day

Take any time

With or without food

The recommended dose of INGREZZA is 80 mg.
Your healthcare provider will start you on 40 mg for 1 week and may keep you on 40 mg, or switch you to 60 mg or 80 mg, depending on your treatment needs.

Important Safety Information (cont.)

The most common side effect of INGREZZA is sleepiness (somnolence). Other side effects include changes in balance (balance problems, dizziness) or an increased risk of falls, headache, feelings of restlessness, dry mouth, constipation, and blurred vision.

These are not all of the possible side effects of INGREZZA. Call your doctor for medical advice about side effects. You are encouraged to report negative side effects of prescription drugs to the FDA. Visit MedWatch at www.fda.gov/medwatch or call 1-800-FDA-1088.
Proven to reduce uncontrolled TD movements

In a clinical study, many people taking INGREZZA® (valbenazine) capsules began to see results in as little as 2 weeks.* People taking INGREZZA are able to stay on most mental health medicines and therefore maintain their mental health progress.

7 out of 10 people taking INGREZZA 80 mg saw reduction in uncontrollable body movements at 6 weeks.

• Patients had at least a 1-point reduction on an uncontrollable movement severity scale at 6 weeks vs before treatment.
• This post-clinical study evaluation included 70 patients taking INGREZZA 80 mg, measuring uncontrollable movements before starting treatment and at 6 weeks of treatment.

INGREZZA provided continued reduction in uncontrollable body movements through 48 weeks.†

*INGREZZA was studied in a 6-week clinical trial. A total of 234 people participated in the study. Results were based on 79 people taking the recommended dose of 80 mg.
†Results of a long-term study.

What is the most common side effect?

The most common side effect of INGREZZA is sleepiness (somnolence). Other side effects include changes in balance (balance problems, dizziness) or an increased risk of falls, headache, feelings of restlessness, dry mouth, constipation, and blurred vision.

See the difference INGREZZA can make with your TD movements

Shift the focus more on you

“Now that my TD movements have reduced, I have an easier time engaging in conversation with family and friends. I can look people in the eye again without being afraid my movements will be a distraction.”

Individual results may vary

– Bethany, living with schizophrenia and tardive dyskinesia
Bethany was compensated by Neurocrine Biosciences, Inc. to share her story

“Since starting on INGREZZA, my symptoms have gotten much better. I can carry on conversations with fewer distractions. And because I’m having less movements overall, I don’t feel so self-conscious.”

Individual results may vary

– Marilyn, living with bipolar disorder and tardive dyskinesia
Marilyn was compensated by Neurocrine Biosciences, Inc. to share her story

Important Safety Information (cont.)

These are not all of the possible side effects of INGREZZA. Call your doctor for medical advice about side effects.

Please see additional Important Safety Information on page 8 and accompanying INGREZZA Patient Information.
Questions you may want to ask your healthcare provider at your next appointment:

- Is my current dosage of INGREZZA providing the best results?
- How much reduced TD body movement should I have right now?

Helpful appointment tips:

- **Have a family member, care partner, or friend join you at your next appointment**—they can help you better understand and remember your healthcare provider’s instructions.

- **Call or email your healthcare provider** (if it’s an option) and ask them to repeat or explain any information you didn’t understand.

- **Learn more about INGREZZA® (valbenazine) capsules and TD** by signing up for helpful resources at INGREZZA.com/Info

Make the most of your treatment experience with the INGREZZA Starter Kit.

The kit contains the INGREZZA Treatment Guide with information on what to expect while taking INGREZZA. It also includes questions to help you track your progress so you can have a better conversation with your healthcare provider at your next appointment.

Visit INGREZZA.com/FAQ for more commonly asked questions, answers, and support.

For a digital version of the INGREZZA Starter Kit, visit INGREZZA.com/Kit

Please see Important Safety Information on page 8 and accompanying INGREZZA Patient Information.
INGREZZA and your mental health medicines

People taking INGREZZA can stay on their current dose of most mental health medicines.

In a clinical study, no overall changes in psychiatric stability were reported for people also taking medicine for:

- Depression
- Bipolar disorder
- Schizoaffective disorder
- Anxiety disorder

Tell your healthcare provider about all the medicines you take, including:

- Prescription medicines
- Over-the-counter medicines
- Vitamins
- Herbal supplements

Please see additional Important Safety Information on page 8 and accompanying INGREZZA Patient Information.

INGREZZA side effects

In a clinical study, the most common side effect while taking INGREZZA was sleepiness.

INGREZZA may cause serious side effects, including:

- Sleepiness
- Heart rhythm problems
- Abnormal movements, including shaking, body stiffness, trouble moving or walking, or keeping your balance

Other side effects included:

- Changes in balance (balance problems, dizziness) or an increased risk of falls
- Headache
- Feelings of restlessness
- Dry mouth
- Constipation
- Blurred vision

These are not all of the possible side effects of INGREZZA.

What should I do if I experience side effects?

Call your healthcare provider for medical advice about side effects. To report side effects to the FDA, call 1-800-FDA-1088.
The INBRACE® Support Program is dedicated to helping you on your treatment journey.

The INBRACE® Support Program is designed to help patients who are prescribed INGREZZA® (valbenazine) capsules by assisting with prescription fulfillment, providing financial assistance options, and product support.

You may pay as little as a $0 copay on your INGREZZA prescription.*

*This offer is valid only for patients who have commercial (nongovernment-funded) insurance. Additional terms and conditions apply.

INGREZZA is available through a select network of specialty and local affiliated pharmacies. A specialty pharmacy provides medicines that aren’t typically available at your local retail pharmacy.

Once coverage has been authorized, INGREZZA will be shipped directly to you via overnight mail.

In some cases, your healthcare provider may send your prescription to a local affiliated pharmacy. This pharmacy will work with you and your provider to fill your INGREZZA prescription.

The specialty pharmacy will call you to discuss delivery and other important details about INGREZZA. Each time your prescription needs to be refilled, the specialty pharmacy may call to verify your information. These calls may come from an unidentified toll-free number, so be sure to answer your phone.

Can you get INGREZZA without prescription insurance?

If you do not have prescription coverage for INGREZZA and lack the financial resources to pay for the medicine, you may be able to receive your prescription at no cost through the INGREZZA Patient Assistance Program.† Your healthcare provider can help you apply for the program or call 1-844-INGREZZA to learn more.

†Additional terms and conditions apply.

To learn more about INGREZZA and the INBRACE® Support Program, call 1-844-INGREZZA (1-844-647-3992) 8 am to 8 pm ET, Monday through Friday or visit INGREZZA.com/Savings-Resources
